

# **100% RENEWABLE, 100% ELECTRIC ENERGY BY 2040: A GOAL FOR OUR TOWNS AND OUR ISLAND**

**An Information Session for Citizens  
of Edgartown, Chilmark and Tisbury**

**Monday, May 17, 4:00 pm**

.....  
A briefing on the 100% Renewable Martha's Vineyard warrant article appearing on spring town warrants. The article sets these aspirational, non-binding goals:

- Increase renewable energy in our electricity supply:  
50% by 2030, 100% by 2040
- Reduce fossil fuel use on island:  
50% by 2030, 100% by 2040
- Foster biosphere carbon capture through land use, saving and increasing wetlands, and growing woodlands

Why aspire to these goals? How can we achieve them?  
Panelists will answer these questions and respond to yours.

.....  
**Host:**

Alan Strahler, *Edgartown Energy Committee*

**Panelists:**

Tom Soldini, Transportation Energy

Marc Rosenbaum, Building Energy

Rob Hannemann, Electricity Supply
