

The Tisbury Water Works will begin the annual flushing of hydrants on Monday April 22nd 2019. This program will ensure that all of our fire hydrants operate properly and improve water quality throughout the town. All flushing will begin at 9:00 am and continue as late as 6:00pm Monday through Friday. Customers may notice a severe drop in pressure while hydrants are flowing. You should not experience a total loss of pressure, if you do lose all water please call the Dukes County Communications Center at 508-693-1212 and they will contact the TWW crew.

Customers may experience some discoloration of the water. If you do draw water while we are flushing near your home, please wait until we are out of the area and run cold water until the discoloration clears up.

As a precaution, customers are urged to check their water for discoloration prior to washing laundry. Should a load of laundry be stained by rusty water contact the Tisbury Water Works office for recommended cleaning instructions.

We appreciate your patience and cooperation **TISBURY WATER WORKS 508-693-3100.**
